

DATA PROTECTION ACT

The names and addresses of people attending our courses are held on a computerised mailing list, which will be used to send you information. Please let us know if you:

- wish your name to be removed
- change your name and/or address
(Please remember to quote your previous name/address)
- receive more than one copy of the brochure

This leaflet is prepared well in advance to provide information before you apply, and therefore, there may be alterations to courses or facilities. Whilst every effort is made to avoid any changes, we reserve the right to withdraw or amend any part of this programme without prior notice.

This is part of the programme of professional development courses run by the School of Science and the Environment.

If you require a certificate of attendance for CPD purposes, please email biorec@mmu.ac.uk before you attend the course.

Using the Vegetative Key to the British Flora

With Mark Duffell

***Monday 18th September 2017
The Gateway, Shrewsbury***

Using the Vegetative Key to the British Flora

Where: The Gateway, Chester Street, Shrewsbury

When: Monday 18th September 2017, 10.00am – 4.00pm

How much: £45.00

Botanists don't always have the luxury of flowers or fruits when conducting fieldwork. This workshop is aimed at new users of the *Vegetative Key to the British Flora* – an exciting new approach to plant identification – and will teach reliable identification by vegetative characters. The workshop is aimed at amateur and professional botanists, recorders and consultants, regardless of previous botanical training.

This practical workshop will include an introduction to vegetative identification using the Vegetative Key, practical identification of native and alien flora and will increase confidence in your ID skills.

Following a brief explanation of botanical terminology, we will study and key out a wide selection of fresh plant material in order to practise identification skills and use of the key.

By the end of the session you will be able to identify a wide range of native and alien plants without flowers or fruit and know how to use the keys correctly (as well as learning a few shortcuts to ID).

Useful items to bring are a copy of the Vegetative Key to British Flora (a limited number of copies will be available to borrow), a hand lens (x20 preferable but not essential) and a notebook.

Tutor: Mark Duffell runs *Arvensis Ecology*, splitting his time between conducting botanical surveys and teaching botanical identification and survey techniques.

Prior booking is essential – please fill in the form opposite and return with your payment to the MMU office at the Gateway or visit the online store: <http://www.sste.mmu.ac.uk/recording> and go to the online store.

If you are booking this course for someone else please could you let us know the name of the person attending.
