

List of Indicia online recording sites and apps

Paula Lightfoot, NBN Trust, 15th August 2013

This is a list of websites, apps and forms that have been created using Indicia. The aim of this list is to give an overview of the diversity of data entry forms that have already been created and are therefore available to clone or adapt for other users, thereby saving development time and costs. Those highlighted in bold and marked with an asterisk are designed to support more structured species surveillance or monitoring rather than ad hoc wildlife records or species lists for sites.
