

DATA PROTECTION ACT

The names and addresses of people attending our courses are held on a computerised mailing list, which will be used to send you information. Please let us know if you:

- wish your name to be removed
- change your name and/or address
(Please remember to quote your previous name/address)
- receive more than one copy of the brochure

This leaflet is prepared well in advance to provide information before you apply, and therefore, there may be alterations to courses or facilities. Whilst every effort is made to avoid any changes, we reserve the right to withdraw or amend any part of this programme without prior notice.

This is part of the programme of professional development courses run by the School of Science and the Environment.

If you require a certificate of attendance for CPD purposes, please email biorec@mmu.ac.uk before you attend the course.

Porpolomopsis calyptriformis. J Maddy

Identification of Macrofungi

**A day course on identifying the larger fungi
with Jeanette Maddy**

**Wednesday 18th October 2017
The Gateway, Shrewsbury**

Identification of Macrofungi

Where: The Gateway, Chester Street, Shrewsbury, SY1 1NB

When: Wednesday 18th October 2017, 10.00am – 4.00pm

How much: £45.00

Have you ever wanted, or struggled, to identify a fungus? Would you like to participate in the recording of fungi? If you are unsure of where to begin or what would be involved then this course will be of interest to you.

Our focus will be on the larger fungi i.e. those species which produce the fruit bodies commonly referred to as mushrooms or toadstools. Following a short introduction to the fascinating world of fungi, we will take a look at fruit body structure and the characters shared by species of particular genera. Using fresh specimens we will practise capturing descriptions of diagnostic features. A number of possible approaches to identification will then be introduced, including the use of keys.

By the end of the course you will be familiar with basic fungal terminology, should be able to recognise several genera, and will have a good understanding of what steps to take when attempting to identify common larger fungi at least to genus and possibly to species.

This introduction to fungal identification will be suitable for beginners and those who may have already tried to identify fungi e.g. by matching up pictures, but would like to take their interest further.

A useful item to bring is a x10 hand lens. Advice on identification resources will be given on the course, but please bring any guides that you have already.

Prior booking is essential – please fill in the form opposite and return with your payment to the MMU office at the Gateway or visit the online store: <http://www.sste.mmu.ac.uk/recording> and go to the online store.

If you are booking this course for someone else please could you let us know the name of the person attending.
