

The background of the slide is a photograph of a branch with several pink flowers and buds. The flowers are in various stages of bloom, with some showing prominent stamens. The background is a soft, out-of-focus blue sky.

**Through partnership, a lot can be
achieved in 12 months!**

A photograph of six puffins standing on a rocky outcrop. The puffins are black and white with orange beaks and feet. They are arranged in a line, facing different directions. The background is a clear blue sky.

The NBN Atlas will revolutionise the use of UK biodiversity data, enabling it to be shared, analysed and researched

A photograph of six puffins standing on a rocky outcrop. The puffins are black and white with orange beaks and feet. They are standing on a grey, mossy rock. The background is a clear blue sky. The text 'The NBN Atlas will revolutionise the use of UK biodiversity data, enabling it to be shared, analysed and researched' is overlaid on the image. Below the image is a search bar with the text 'Search the NBN Atlas' and a magnifying glass icon.

NBN Technical Team

Sophie Ratcliffe
Technical & Data
Support Officer

Reuben Roberts
Systems Developer
(from 1st Dec)

NBN Atlas – main issues

Priorities

- Vague dates & date ranges
- Mix of grid and point occurrences
- Download fields
- Improved species search
- Occurrences observed by name
- Encyclopedia of Life information

Data Transfer

Huge effort from Data Partners & NBN staff

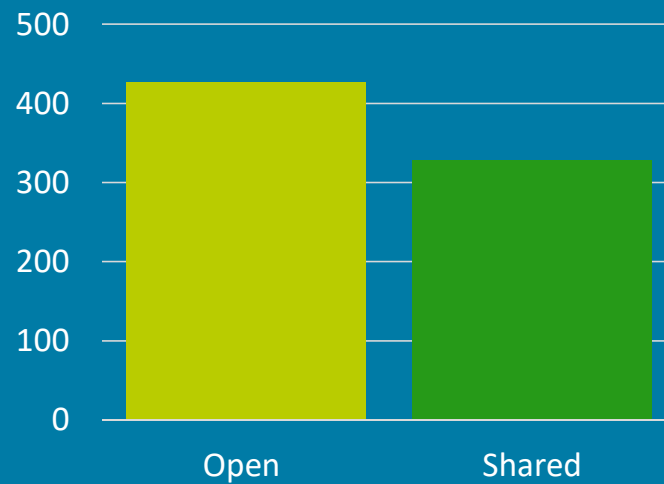

- 719 datasets transferred from Gateway
- 76% of those publicly available on Gateway

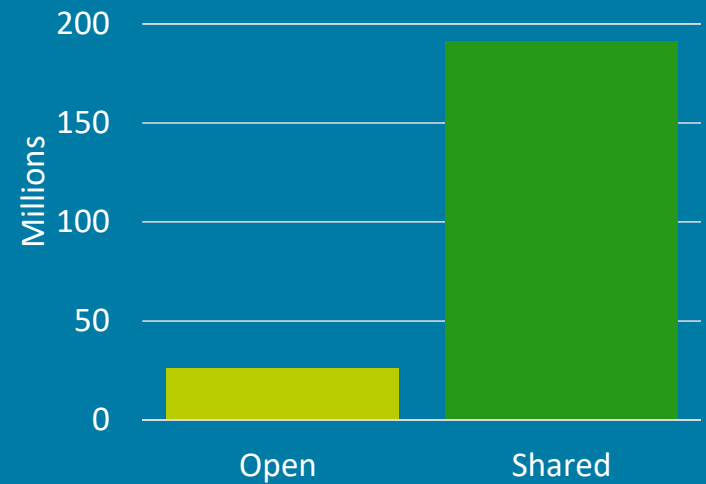

Licences

Datasets

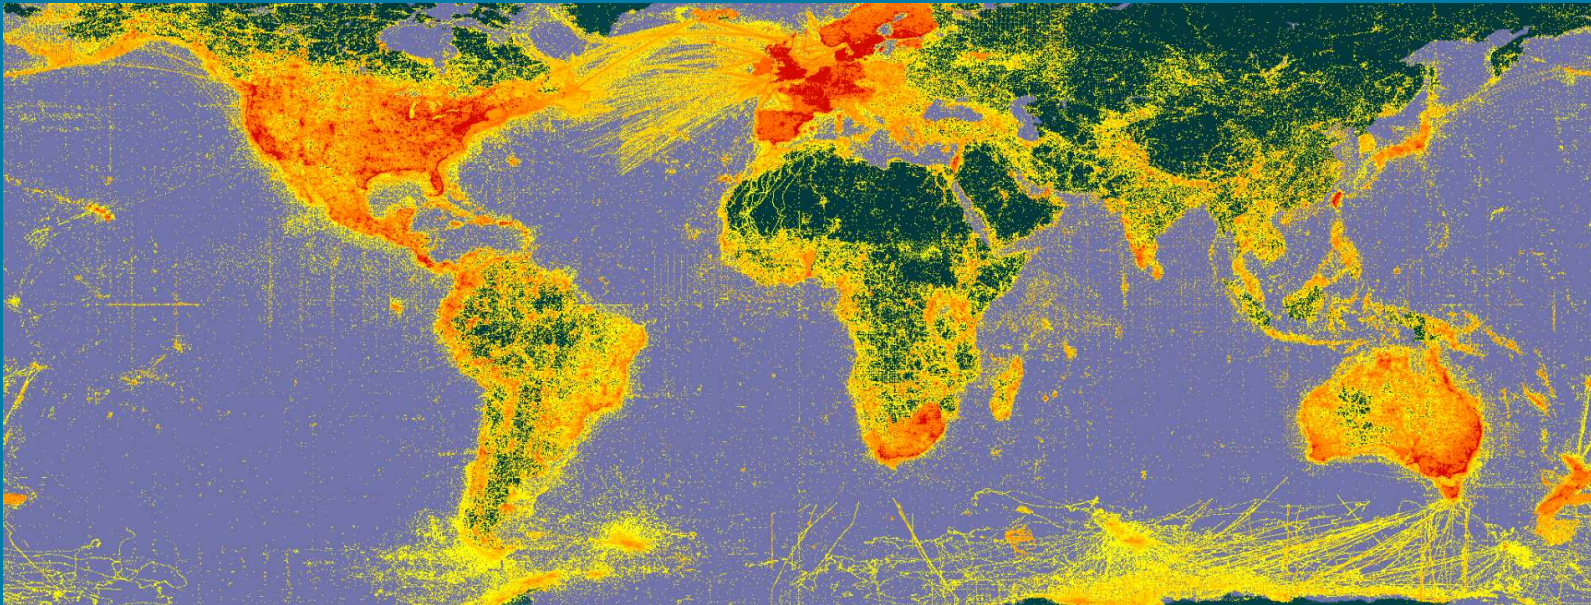

Records

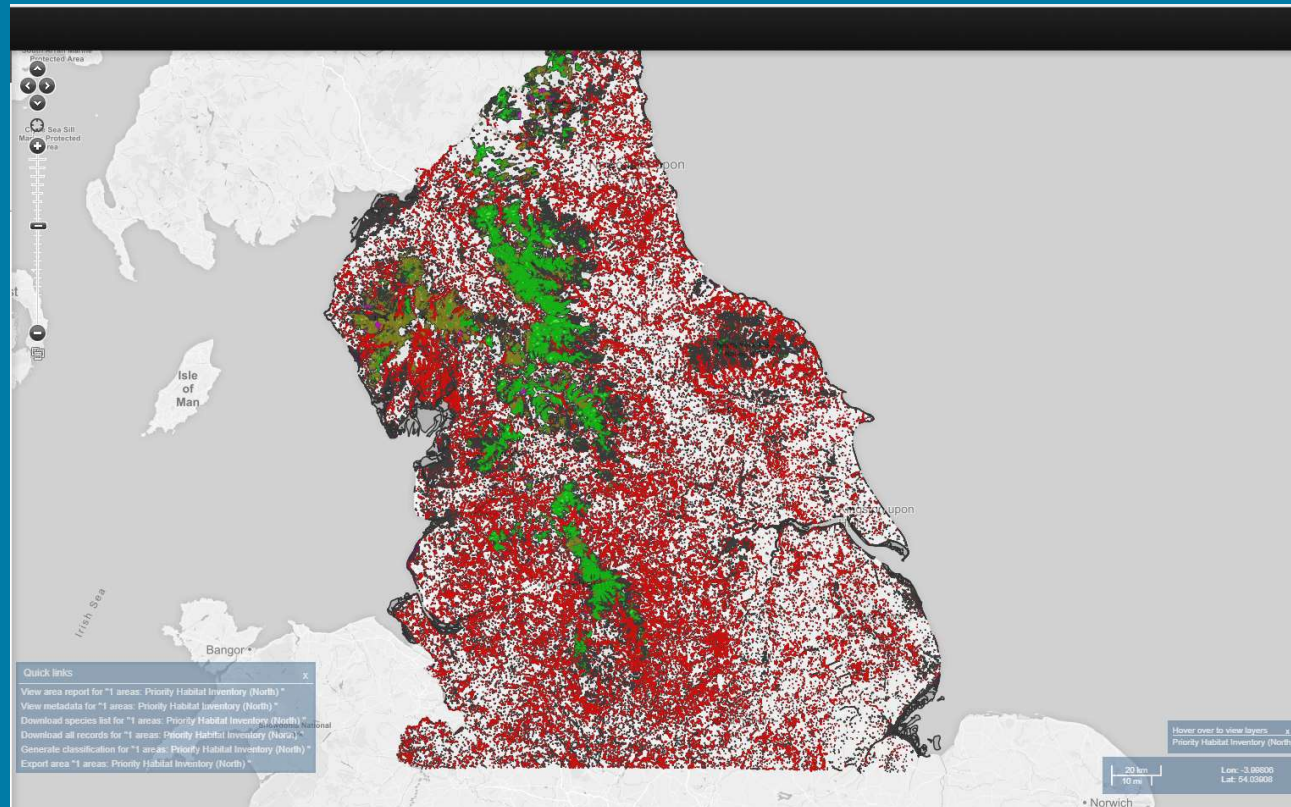

GBIF

- 75 million records
- 2nd largest contributor

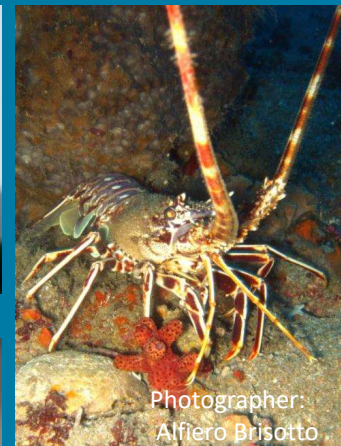

Spatial layers

- 53 layers sourced & uploaded
- Includes habitat, landscape, political & administrative layers

Sensitive Species

- Workshop held in August
- Criteria for inclusion on sensitive species lists agreed
- Policy has been drafted

Verification status

The Quality Control and Verification, Biological Recording Online & Improving Biological Data Flows working groups merged

- Group agreed to adopt standardised verification terms
- Will be used in NBN Atlas

Verification Status 1	Verification Status 2
Accepted	Correct
	Considered Correct
Not Accepted	Unable to verify
	Incorrect
Unconfirmed	Plausible
	Not reviewed

Other things

- Guidance on:
 - meaning of non-commercial use
 - historic data
- SBIF Review
- CIRIA Big Biodiversity Awards
- Nottingham in Parliament
- NBN Awards

Next 12 months

NBN Atlas

- Access to sensitive species data
- Stakeholder workshops – extra functionality
- Automated upload from iRecord
- Increase number of habitat, spatial & environmental layers
- BioCollect & MERIT

Next 12 months

- Record Cleaner
- Board governance restructure (come to AGM to hear more!)
- Strategy for mobilising historic data
- Online recording systems
- Consultants Portal

Here's to the next 12 months!
