

# The SBIF Review

Re-imagining our Data Infrastructure  
for sustainability and success

*Ellen Wilson, Chair*

*Scottish Biodiversity Information Forum*

*NBN Conference 2017*

# **SENSITIVE INFORMATION INSIDE**

*work in progress, handle with care*

# Why have a Review?

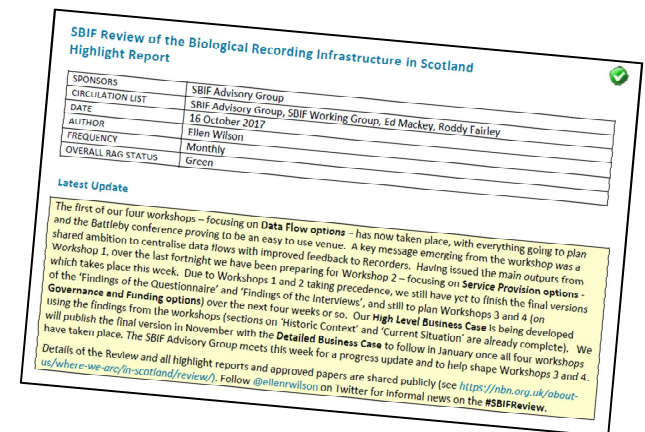

- Public petition for an effective infrastructure
- Many stakeholders, many relationships
- Diverse needs and diverse priorities
- Things could be (a lot) better
- History repeating itself...

# High-level Plan

- STAGE 1: Set up the Working Group and complete planning for the Review
- STAGE 2: Gather perspectives, requirements and other information from key stakeholders
- STAGE 3: Hold workshops to find and evaluate options at central, national and local levels
- STAGE 4: Issue recommendations and plan their implementation
- STAGE 5: Support implementation of recommendations and monitor progress

*See SBIF Review pages on the NBN website  
for more details and highlight reports*

***"It would be tragic if the wealth of amateur talent for, and interest in, natural history in this country remains largely untapped because of the lack of a system for ensuring the flow of data from those who have it to those who require it."***

**BRC - 1978**

#### Programme of Forum

1. What is a biological record?
2. Validation of records
3. Networking
4. Data storage - Records Centres keep records - How?
5. Computing
6. Users and uses
7. The problems being faced

***"The challenge is to convince all those concerned that by working together we can make maximum use of limited resources"***

**Copp & Harding - 1985**

# Key messages from the Interviews

## Findings of the Interviews

## Service Community want -

- consistent system for screening planning applications
- sustainable funding
- technical and IT support for national schemes, recorders and users
- central database with access to attribute rich data of known quality
- income generated from adding value to data
- improved networking and knowledge transfer
- more support for recording community

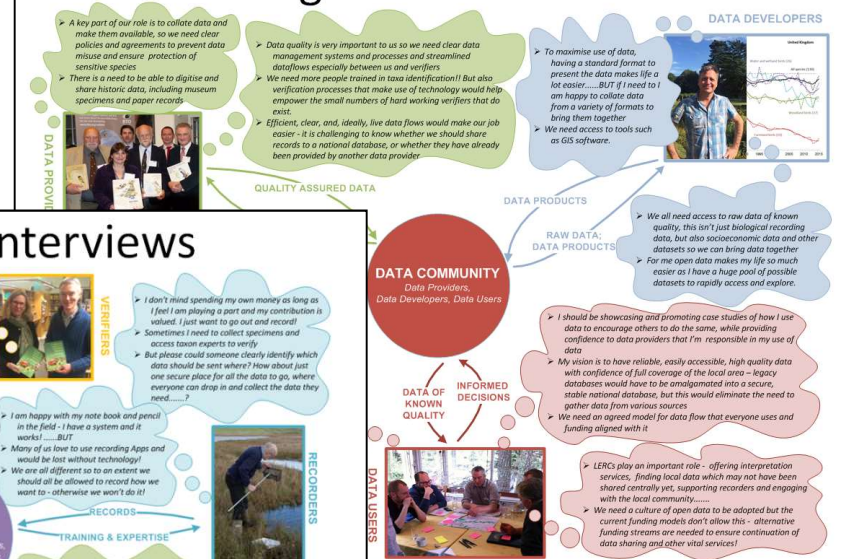

## Findings of the Interviews

## Biological Recording Community want -

- simple, transparent data flows into a stable central database
- consistent verification process with standard data formats and automation where possible
- sustainable funding
- mobilisation of historic data

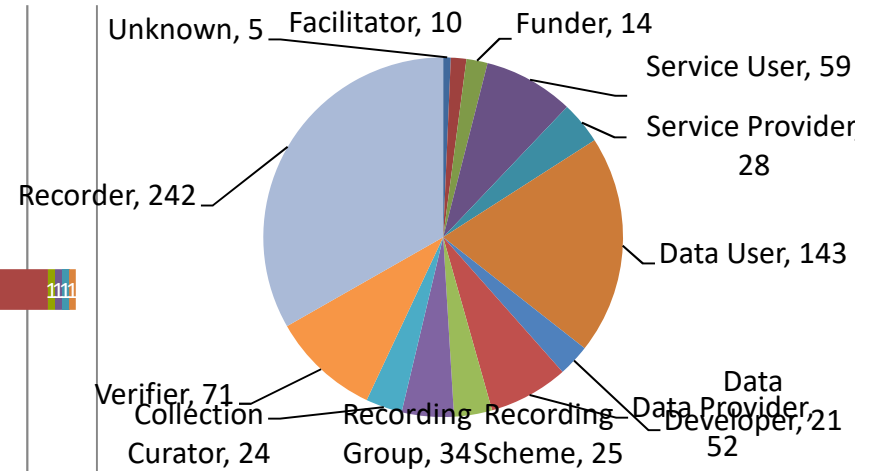

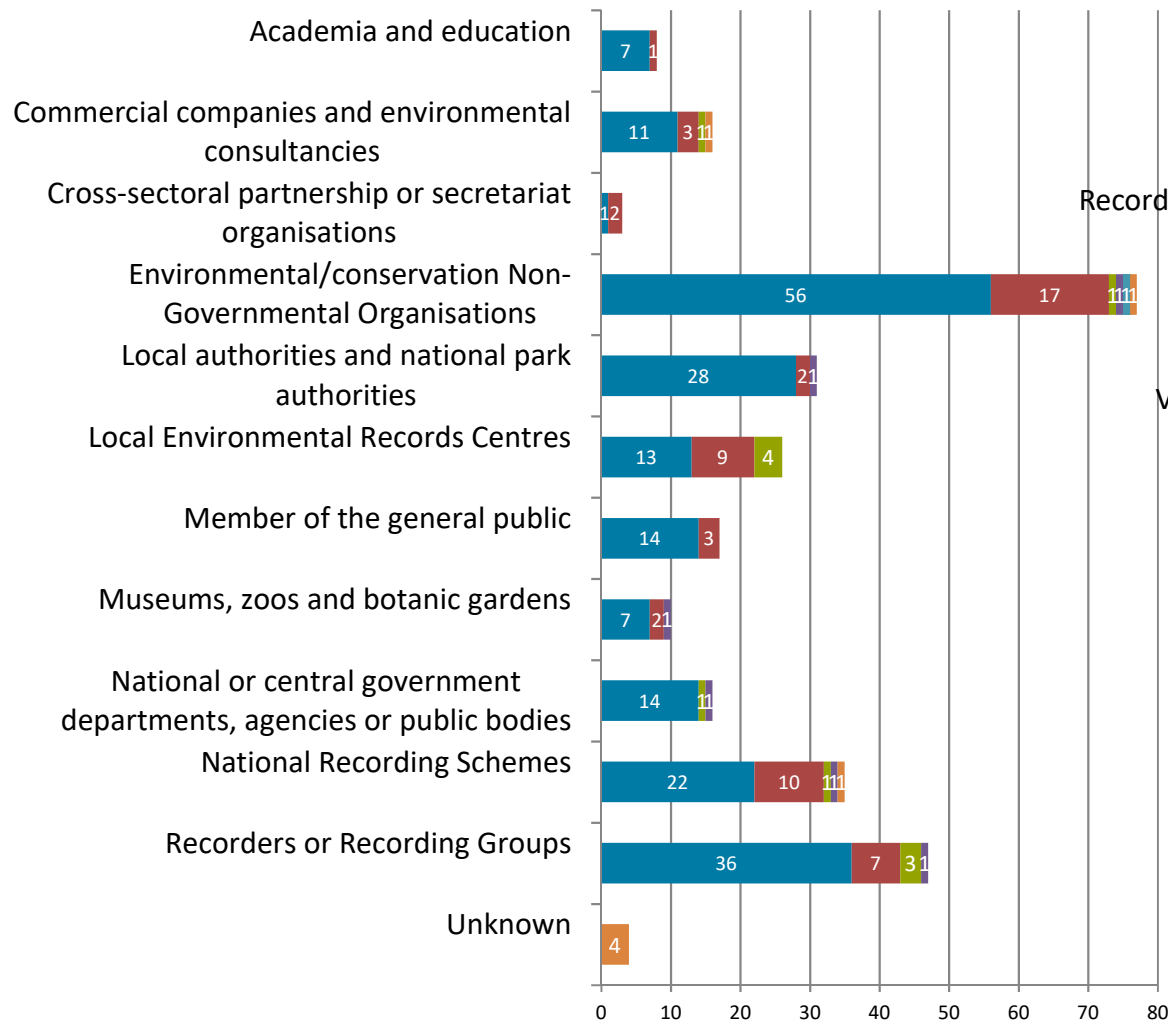

## Findings of the Interviews

## Data Community want -

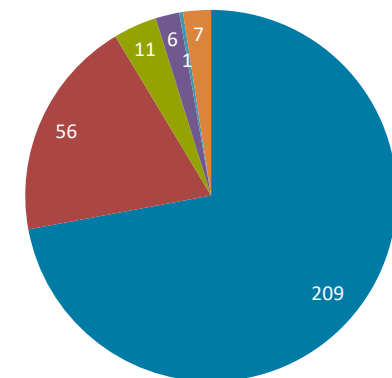

- clear and simple data flows
- tools to manage data holdings
- data of known quality available in a well-funded central database
- centrally agreed standards on openness
- easily accessible, reliable, high quality data
- confidence of full geographic coverage across all areas

# Findings of the Questionnaire

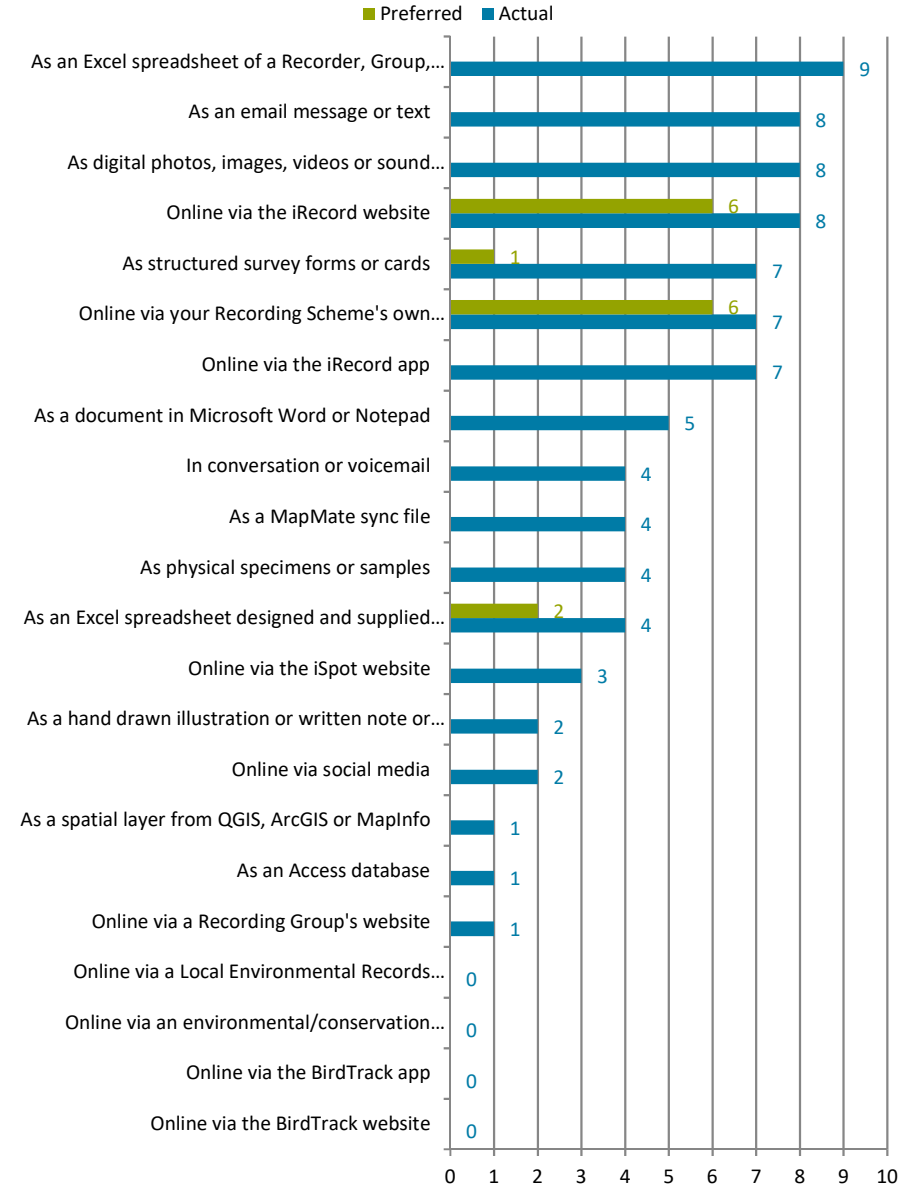

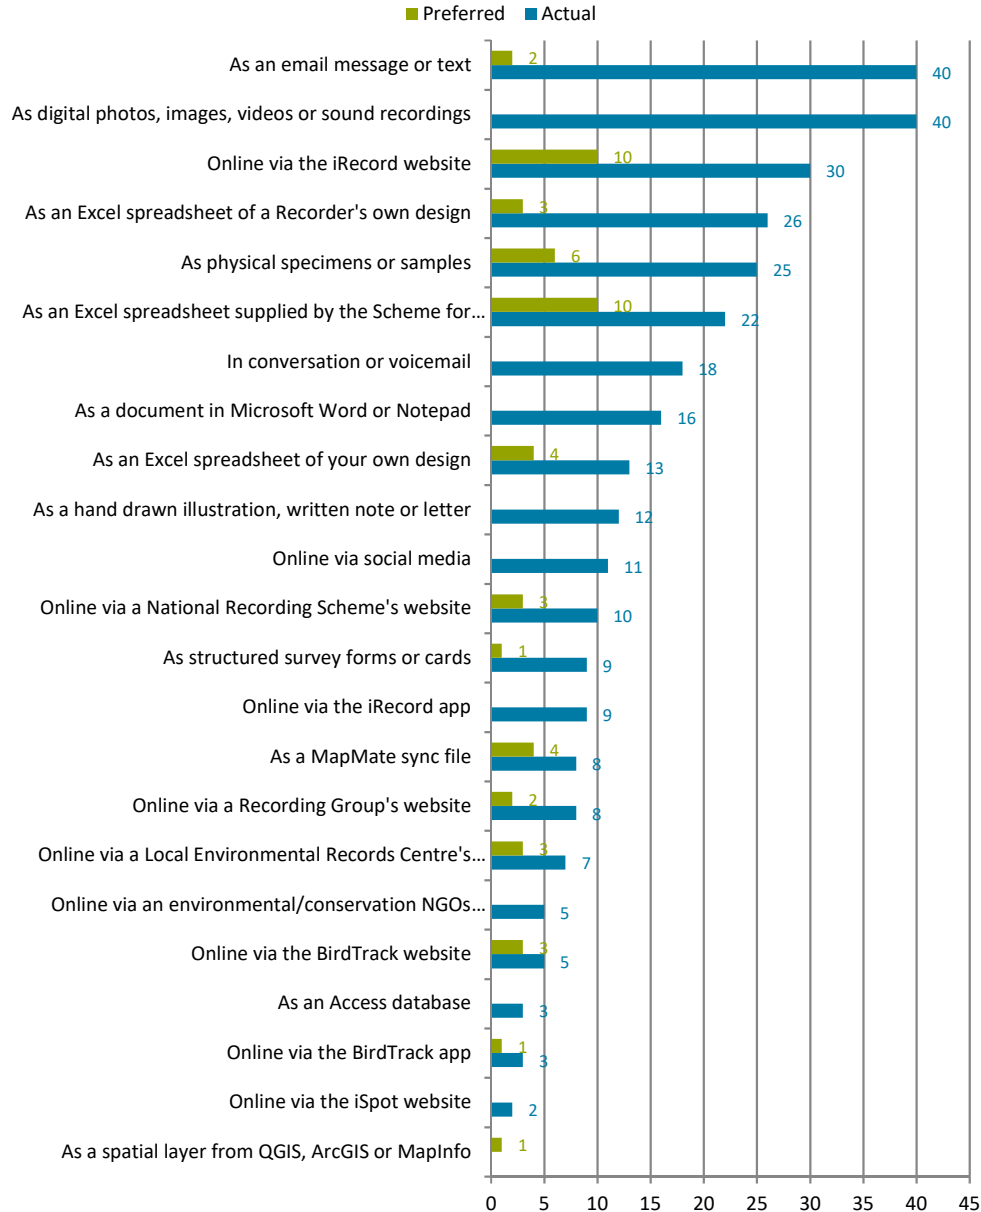

72% of responses from Scotland, 19% from England

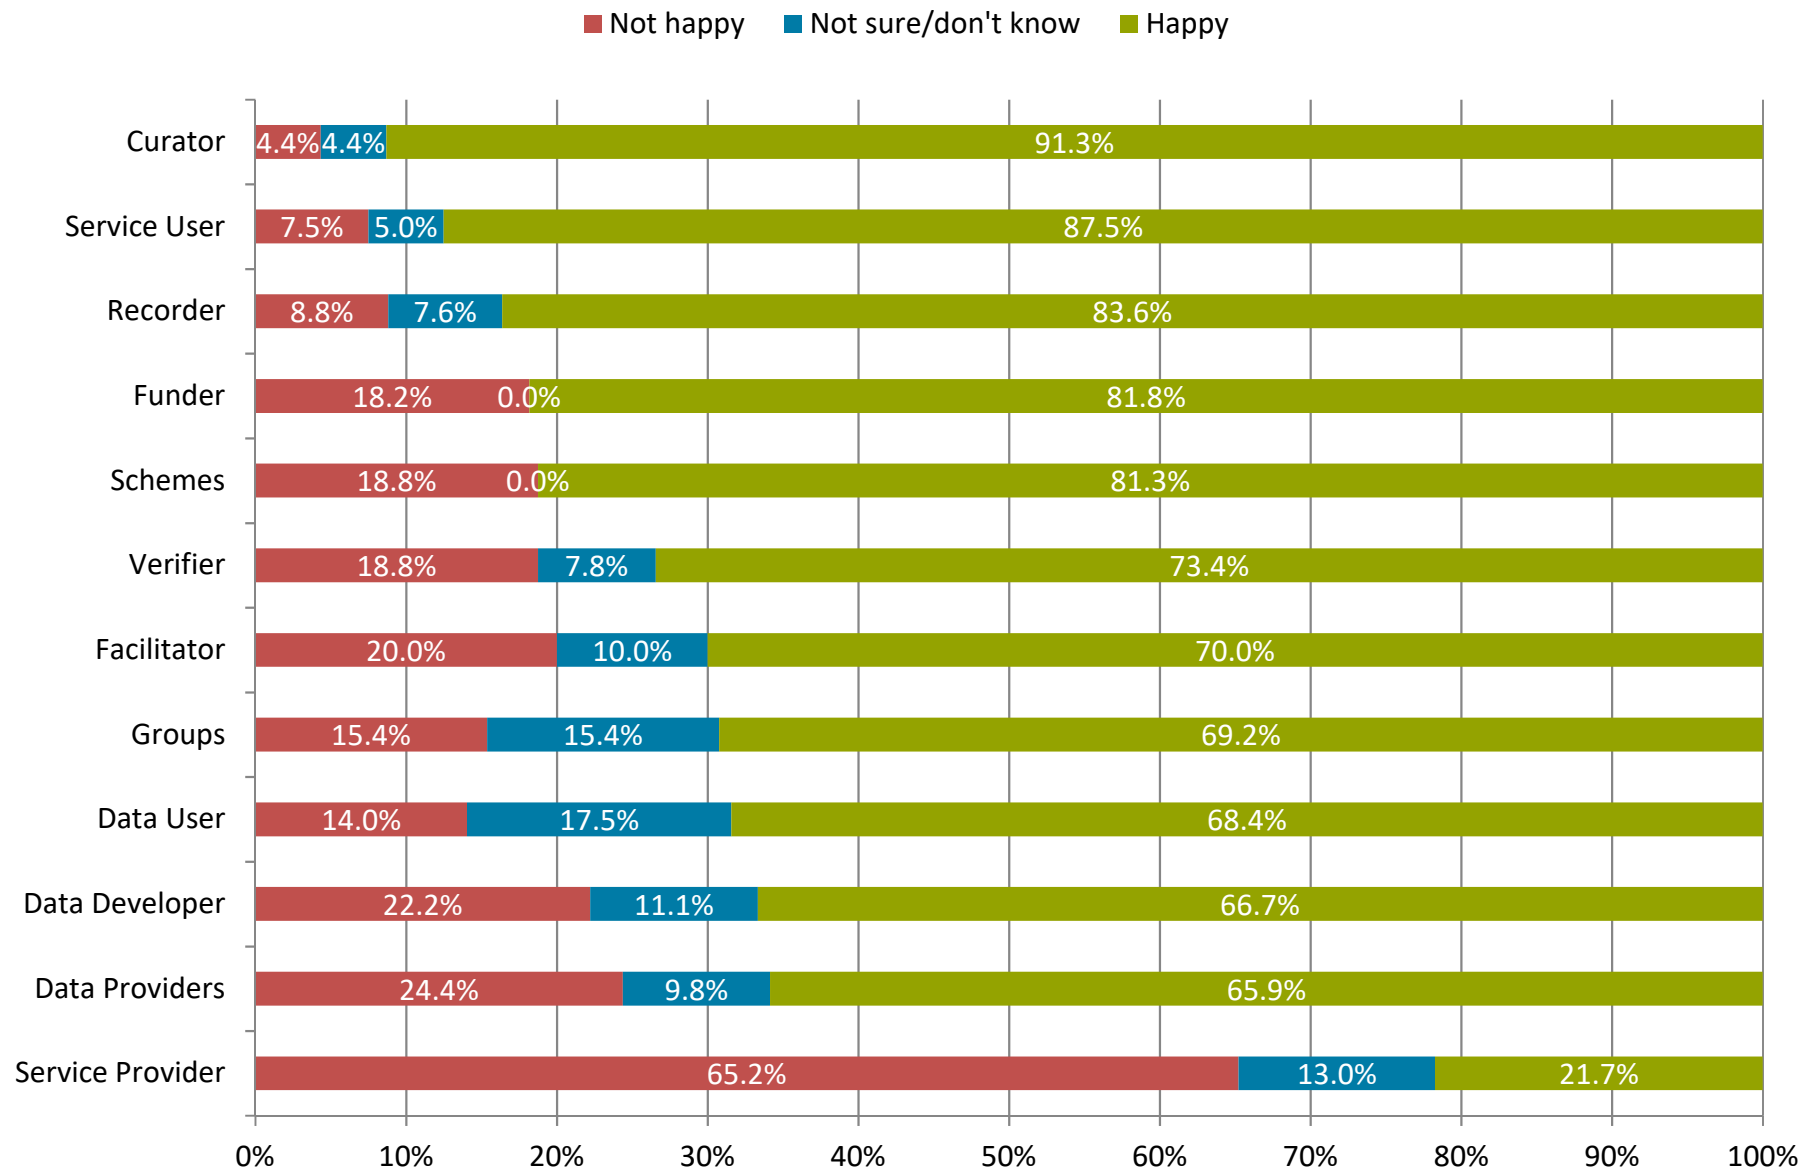

Scotland England Wales NI UKOTs Unknown

All sectors fulfil  $\geq 75\%$  ( $\geq 9$  out of 12) of all roles (except x-sectoral partnerships/secretariats)

## Verifiers handle a wide range of formats, Schemes prefer online formats

Service Providers are least happy about Open Data because of the need to cover costs...

Access to resources, access to data, data submission and verification working less well,

## Workshop 1 on Data Flows

# Our Proposed Data Flow Model

**Workshop 2 on Services**

# Our Proposed Service Model

## Regional Services

Enhanced data search/bespoke reports including sensitive records  
Expert planning screening including interpretation/advice  
Local Recorder engagement and mentoring  
Local Recorder liaison and contact management  
Loan of/access to field or lab equipment etc  
Entry level engagement and small events for the general public  
Entry level taxonomic training and mentoring

## National Services

Automated planning screening  
Data driven local and national species lists  
Gap analysis for species and habitat monitoring  
Composite habitat map data curation (HabMoS)  
Bespoke analysis/reporting tools for national government  
Archiving of individual/personal specimens and collections  
Management of voucher collections/loan of reference material  
Ecological training to support delivery of biodiversity duty  
Apprenticeship schemes  
Locally important site designation and registration  
Specialist taxonomic training  
Fast-tracking/backlog management for verification/digitisation

## Central Services

Financial management and procurement  
Legal, HR, IT and admin support  
Accreditation, standards and innovation  
UK Species Inventory management and development  
Technical platform and central data warehouse  
Technical support and training for developers/data managers  
Data management of a central data warehouse  
Scheme record submission portals and curation and analysis tools  
Adhoc record submission and curation portal  
Commercial and academic record submission and curation portal  
Invasive species submission and curation portal  
Automated validation and verification  
Viewing, presentation and visualisation tools  
Reporting tools for sites, postcodes, species and habitats  
Habitat survey submission and curation portal  
Social media harvesting  
Aggregation of, and access to, non-commercial/non-academic data  
Aggregation of, and access to, commercial/academic data  
County/Vice-County Recorder liaison and contact management  
Scheme Recorder engagement and mentoring  
Scheme Recorder liaison and contact management  
Major event management

## Cross Cutting Services

Office space and facilities management  
Access to premium OS data (raster and vector)  
Expert mapping and GIS including visualisation/presentation  
Innovation

Regional

National

Central

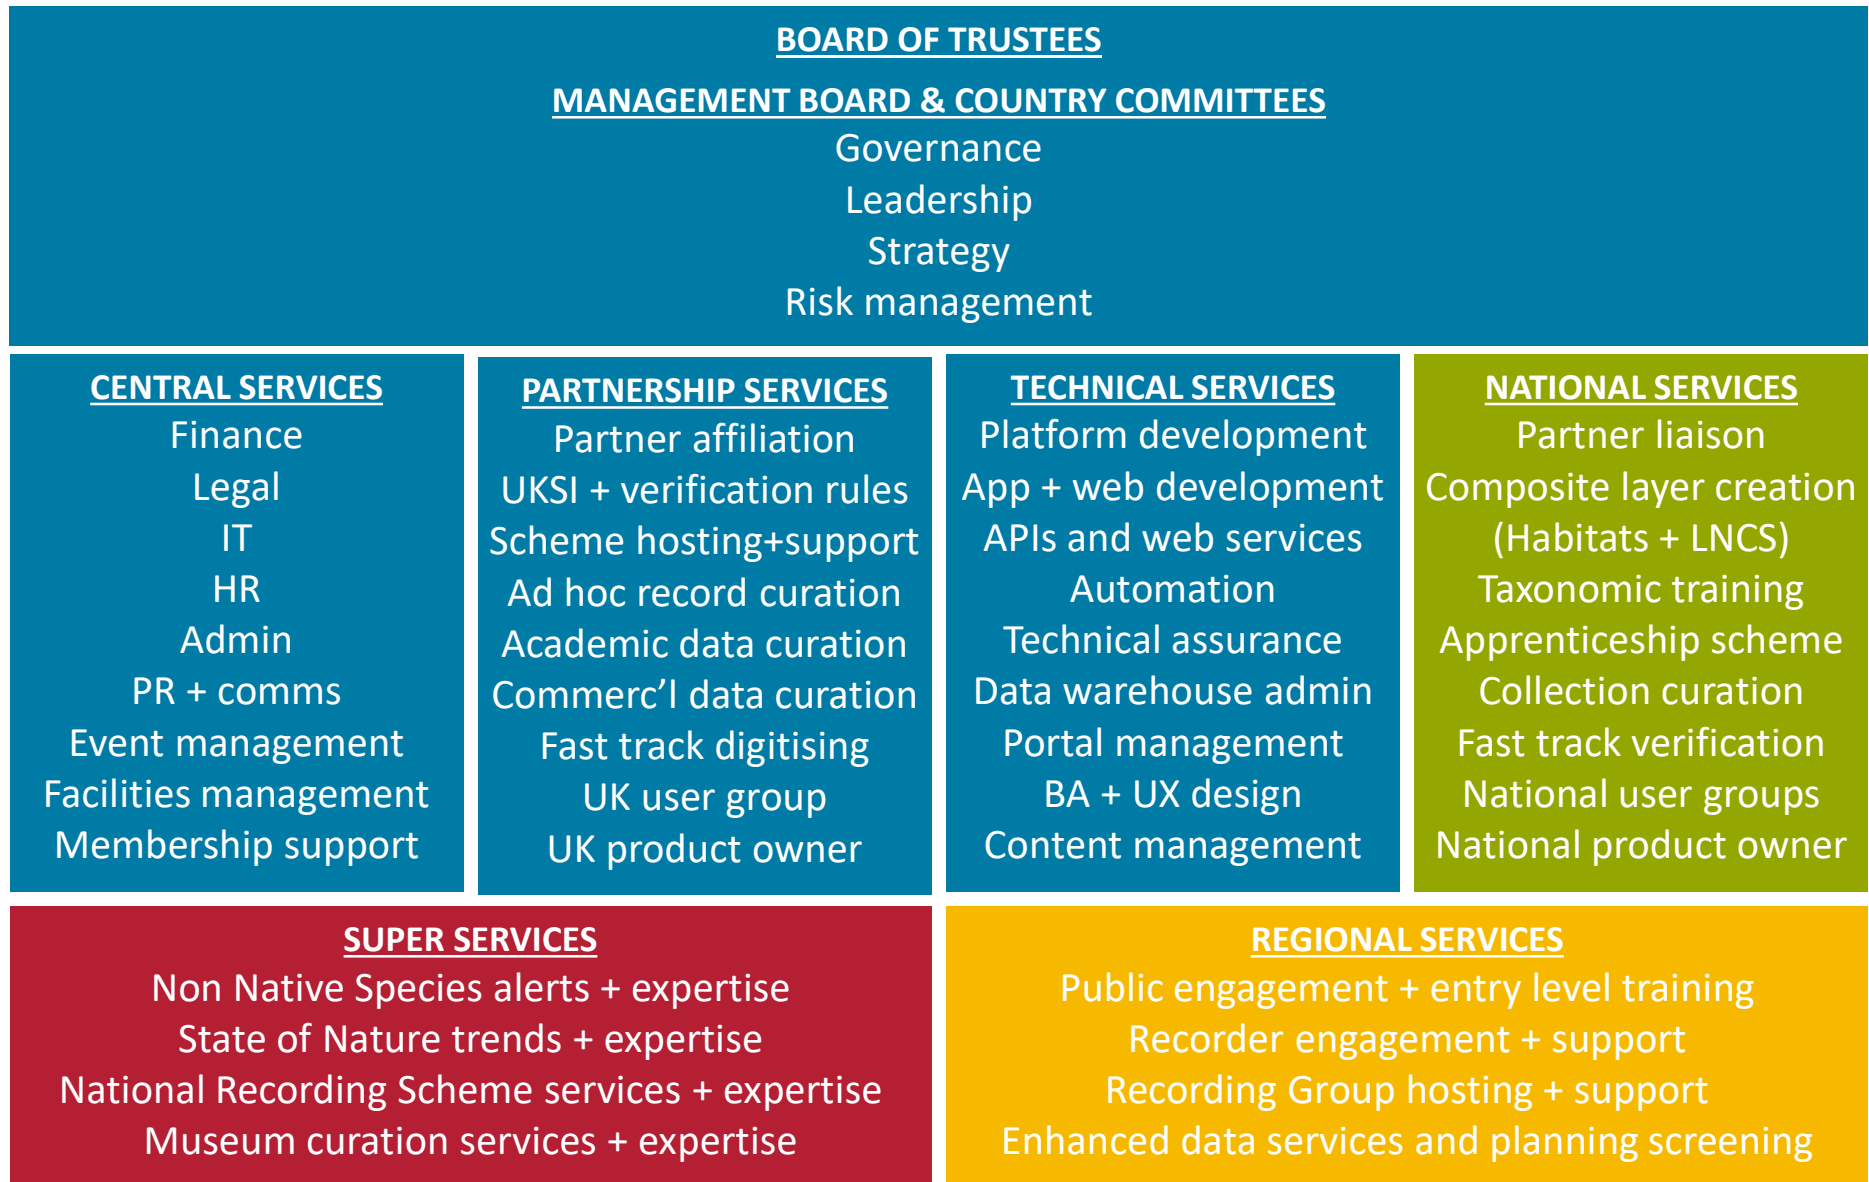

X-Cutting

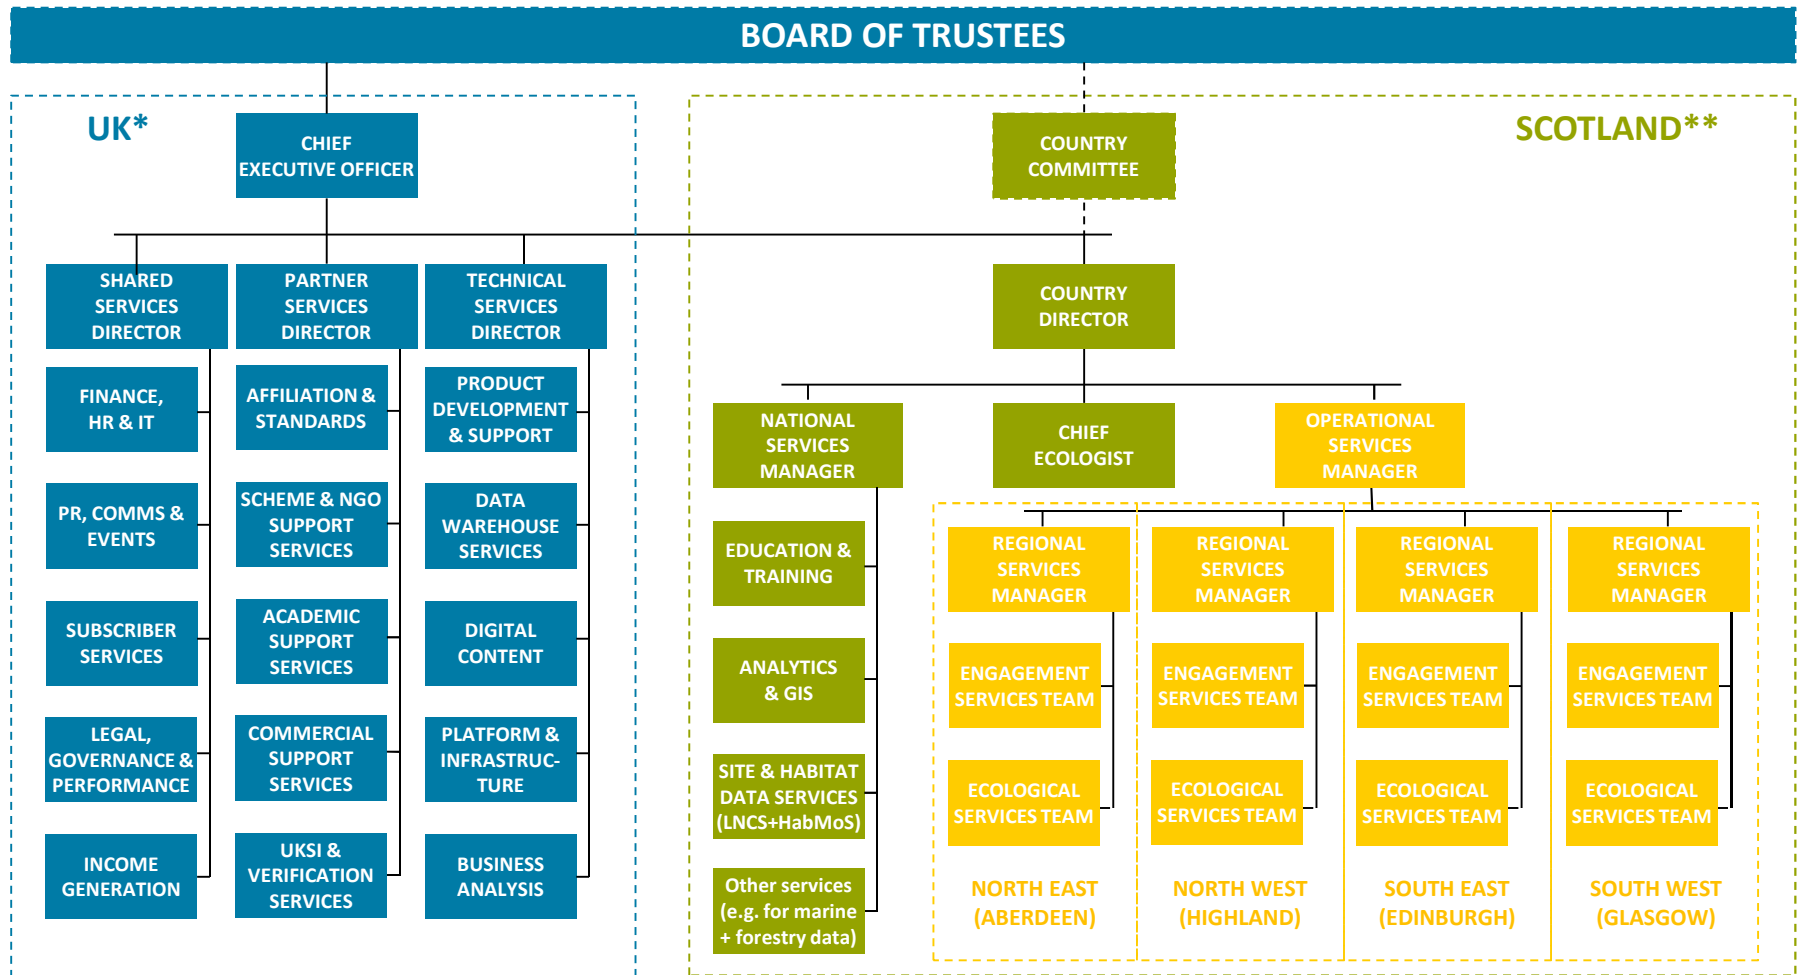

## Workshop 3 on Governance

# 'Aunt Sally' Model:

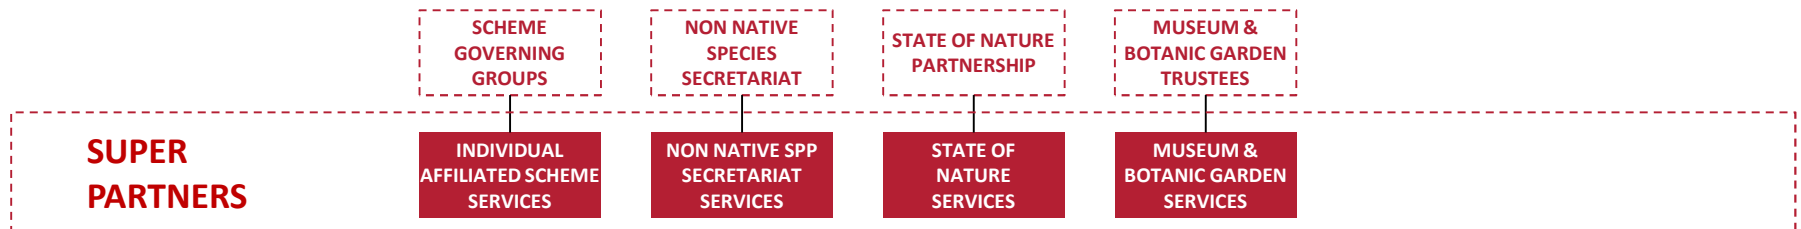

# Our Proposed Governance Model

\* Where of value, some central roles could be out-posted in a National Hub

\*\* Regional Hub locations are not yet confirmed

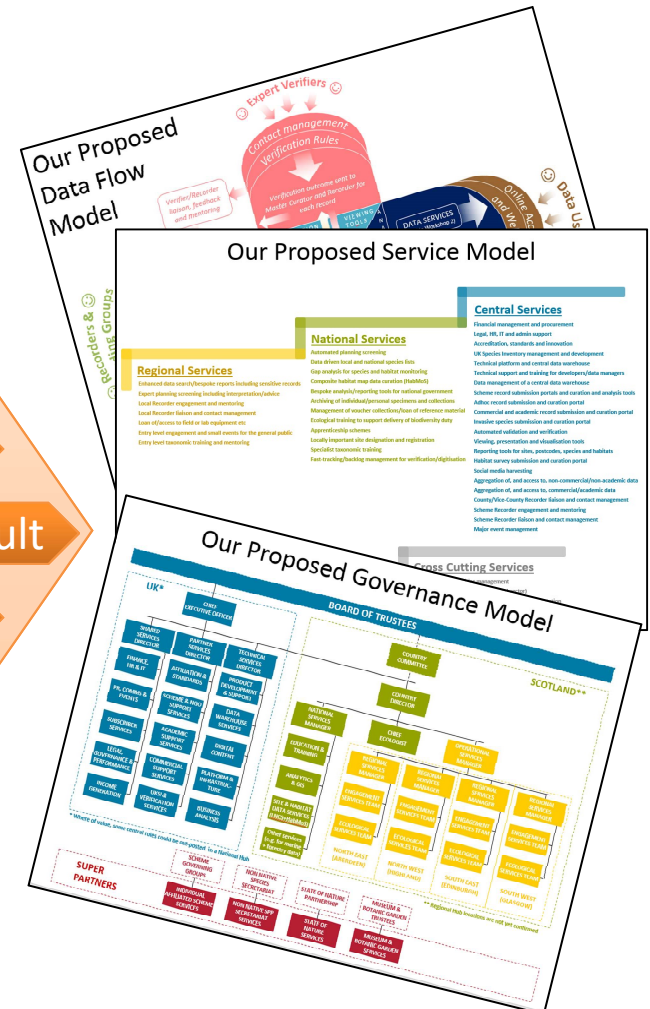

## Next Steps...

# 2018+

# 2019-2025

**If you are interested in finding out  
more, or joining in, please get in  
touch with Ellen or Christine**

**All countries and regions welcome!**

***Thank you to everyone involved***
