

NBN Atlas Update

This paper presents a summary of use of the NBN Atlas since its launch on 1st April 2017. It also includes information on feedback received and help available for users.

Data

The table below shows the breakdown of the number of records, datasets and data partners on the NBN Atlas as at the 29th August 2017.

Records	215,815,248
Datasets	726
Data Partners	169

Figures 1 to 3 below show the number of records by resolution, number of records by licence type and number of datasets by licence type respectively

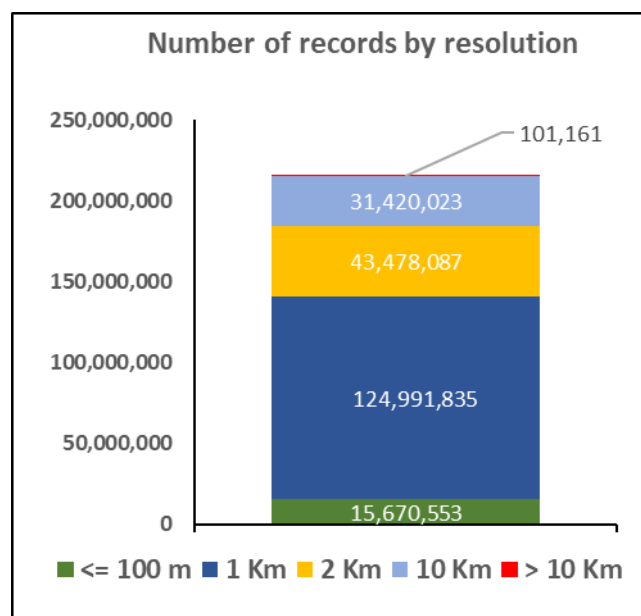

Fig. 1. Number of records by resolution

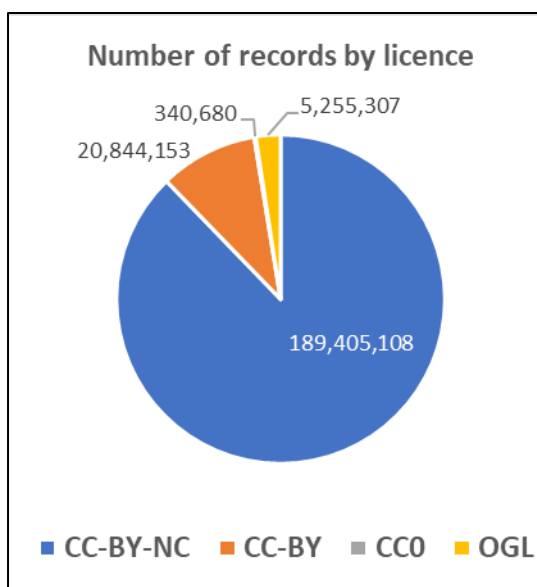

Figure 2. Number of records by licence

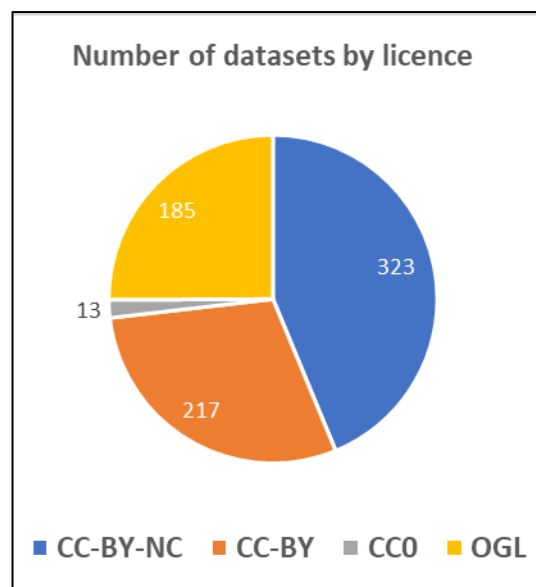

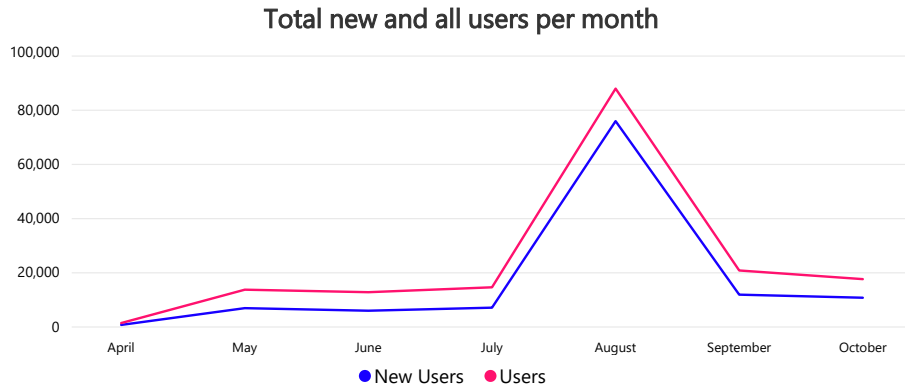

Figure 3. Number of datasets by licence

NBN Atlas Usage statistics 1st April to 23rd October 2017

NB Figures for August are significantly different due to the impact of a BBC News online story about Japanese Knotweed that featured the NBN Atlas
