What do you most want from the iNatUK User Group?

- **1st** Sharing ideas and experiences
- **2nd** Helping influence new iNat developments internationally
- **3rd** Finding opportunities to collaborate with other users
- **4th** Seeing what others are doing with iNat
- **5th** Learning more about iNat
- **6th** Other

21

If the iNat User group could address one specific need for you now, what would it be?

Streamline and improve data flow

record validation

Help communicate the often complex issues around how to get involved with biological recording and where the data goes

Send my data to recording schemes so I don't have to enter it twice.

Sharing Data from iNat into the UK validation system (iRecord)

Improving data flow

Sorting out the iNat to iRecord link

Ensuing iNat records feed into the UK recording schemes for consideration... but I think Martin has already confirmed that will happen (as a trial?), so well done!

data flow through to the NBN Atlas (with extra vice county recorder checks to weed out iNat records that don't make the higher bar)

17

If the iNat User group could address one specific need for you now, what would it be?

Ensuring that data submitted has real world value/impact.

The reassurance that data captured would end up in UK datasets

To help our local recorders and especially those new to recording to navigate the complex ecosystem of online recording tools without replication of effort or records.

Establish and clear up verification processes and audit trails between the flow of data from iNaturalist to iRecord

Increasing confirmed records by experts with good photos so the AI can improve

Clarify how iNat observations contribute to national recording

simple resources for using iNat for british audiences

Appreciate the potential of the use of tools like iNat that are user-friendly, flexible, full of functionality, and innovation. It attracts users and helps accelerate the throughput of records.
