iNaturalistUK Users

Who Uses iNaturalist United Kingdom?

"iNaturalist allows anyone with a camera and internet to share nature observations with people all over the world. Whatever living things you are interested in, everyone from complete beginners who want to find out the name of something they have found, to scientists collecting data for research are welcome!"

Dr Victoria J Burton

Scientist and naturalist
London / West Sussex

I am passionate about UK biodiversity, its identification and recording, and am an active member of many natural history societies and recording schemes. I am particularly interested in soil and leaf litter invertebrates. Currently working at the Natural History Museum, London.

Following the recent launch of iNaturalist in the UK, led by the NBN Trust, we would like to know more about how individuals, organisations and groups are using iNaturalistUK to gather data and engage people in recording wildlife. We initially plan to set up a 'focus' group to meet online in September. This will be supported by an online survey to ensure we get feedback from as many users, and potential users, as possible. Our initial four aims are to:

- Establish how iNaturalist / iNaturalistUK is currently used in the UK
- Establish what organisations want to use it for in future
- Identify how the NBN Trust, as the UK lead, can help you make best use of iNaturalistUK
- Discover what general improvements users would like to see

Read more [here](#) If you are interested in getting involved either by attending an online meeting or completing short surveys in future, please email inaturalistuk@nbn.org.uk with the following information

- Name
- Organisation / group name if appropriate
- Reason for wanting to be involved e.g. project organiser, data user, curator, regular user

We look forward to hearing from you.

The screenshot displays the iNaturalistUK 'Observations' page. On the left, a map of the United Kingdom is shown with a search bar and a 'United Kingdom' filter. The main content area is a sidebar with various filters and search options. The filters include:

- Show:** Wild, Captive, Verifiable (checked), Research Grade, Needs ID, Threatened, Introduced, Popular, Has Sounds, Has Photos, Your Observations.
- Description / Tags:** A text input field containing 'blue, butterfly, etc.' and a 'More Filters' button.
- Person:** A dropdown menu for 'Username or User ID'.
- Project:** A text input field for 'Name or URL slug, e.g. my-project'.
- Place:** A dropdown menu for 'United Kingdom'.
- Categories:** A grid of icons representing different species groups.
- Rank:** A dropdown menu for 'High' and 'Low'.
- Sort By:** A dropdown menu for 'Date Added' and 'Desc'.
- Photo Licensing:** A dropdown menu for 'All'.
- Reviewed:** Radio buttons for 'Any' (selected), 'Yes', and 'No'.
- Date Observed:** Radio buttons for 'Any' (selected), 'Exact Date' (YYYY-MM-DD), 'Range' (Start/End), and 'Months' (Select Options).
- Date Added:** Radio buttons for 'Any' (selected), 'Exact Date' (YYYY-MM-DD), and 'Range' (Start/End).

At the bottom of the sidebar, there are buttons for 'Update Search' and 'Reset Search Filters'. The bottom right corner of the page shows links for 'Identify', 'Atom', and 'Download'.
