

Transforming our investment in England's biological data infrastructure

Natural Capital & Ecosystem Assessment

Dasgupta Review & Natural Capital Committee Final Report

- UK Government has set world-leading ambition on protecting our natural assets, internationally through the Convention of Biodiversity and domestically via the ground-breaking 25 Year Environment Plan.
- Intrinsically linked to the successful delivery of Net Zero, protecting our environmental services has never been more vital.
- Achieving these goals needs to underpinned by the provision of systematic and robust evidence.

The Natural Capital & Ecosystem Assessment Programme

- The NCEA is a transformative Defra Group programme
- Aims to transform what and how we invest in data and evidence products

Natural England Programme Elements:

Data Mobilisation & Management

Mapping & Earth Observation

Field Data Collection

Citizen Science Programme

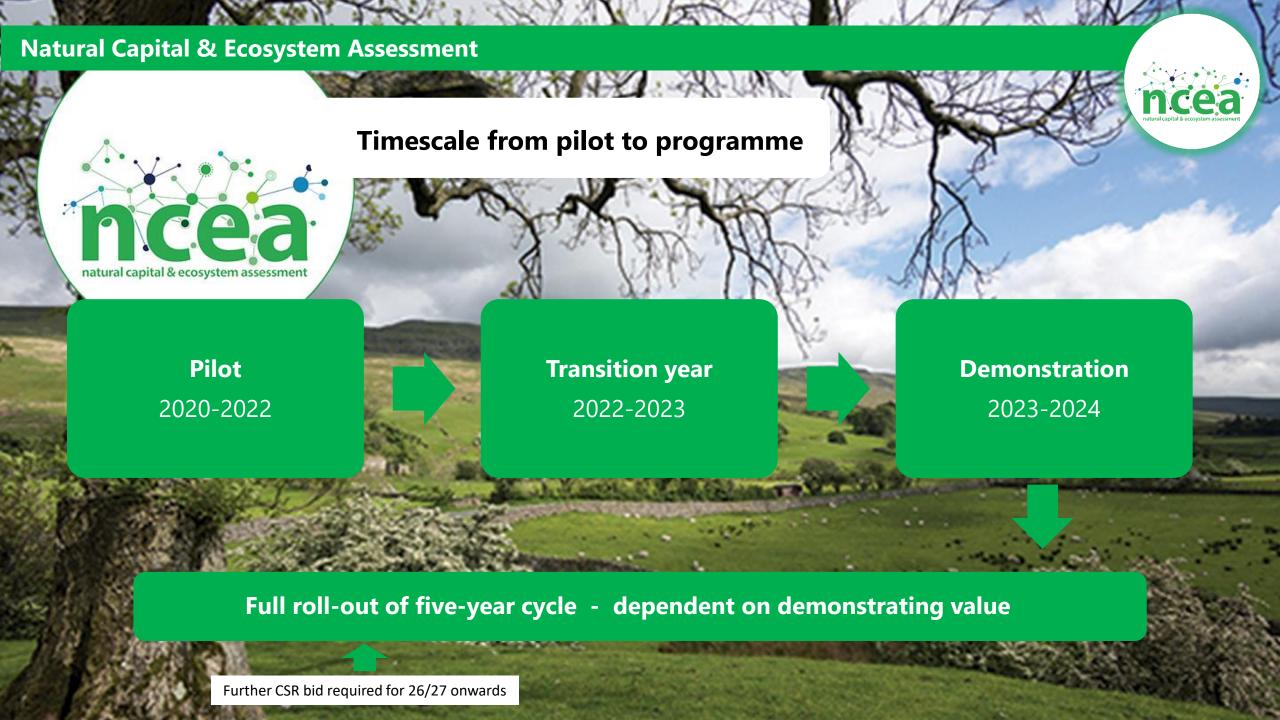

Natural Capital & Ecosystem Assessment

Local Nature Recovery Strategies

Environmental Land Management Natural Capital Accounts

Natural Capital & Ecosystem Assessment

Wealth of data available:

- Citizen science and volunteer recording schemes,
- Local record centres
- Long-term monitoring programmes
- Research institutes / universities

BUT

- Significant gaps / poorly covered natural capital assets
- Out-of-date data
- Incomplete national coverage
- Lack of granularity
- Not always accessible
